Silicon Valley bootcamps in Tirana for the first time ever. In collaboration with Coding Dojo – a Top 10 coding bootcamp provider in the World – we offer state-of-the art computer science training that will get you closer to your dream job.

THE BEST AND MOST IMMERSIVE CODING BOOTCAMP

About Us

betaPlan – an IRIS Sh.P.K. and Coding Dojo partnership – consists of an executive team that has long been active in the Albanian TechEd space through international partnerships. We are deeply passionate about your future and want to take you closer to your dreams.

Pick your full-stack and make your dent in the universe!

Our Mission

Our goal is to provide a standardized way for the Albanian tech companies to upskill and reskill their engineers. We are eager to help your company unlock the time of your most skilled programmers, while increasing the efficiency of the onboarding of your new hires.

Cut cost and build a Silicon Valley level team!

Our Solutions

We know that a successful company runs lean, that is why we foster **full-stack** engineers that add versatility and robustness to your teams. By offering the most in-demand coding languages for web development we enable you and your company to compete globally.

Why Choose Us

betaPlan is the only coding bootcamp provider in Albania that makes accessible the expertise found at some of the best Silicon Valley companies like Facebook, Apple and Google, to the Albanian community. It is critical for the Albanian companies to learn from the forefront of technology to successfully take part in the Fourth Industrial Revolution.

Coding Dojo, with 10+ years of experience, provides a refined curriculum and a learning platform to the betaPlan bootcamps. Our instructors are trained and certified by the highly adept Dojo experts in San Francisco. The Dojo methodology focused on full-stack training enables alumni to obtain 67% higher salaries for college graduates in the US. The average annual salary of Dojo graduates in the US is \$76k, with an alumni employment record of 86% within the first 6 months after graduation.

20 HOURS / WEEK FOR 16 WEEKS TO LAND YOUR DREAM JOB

Web Fundamentals

Week 1-4

Start by learning the basics of front-end development – **CSS, HTML, JavaScript**
